#### NEW ATTRACTIONS FOR RIVERSIDE

"The Old Mill" has been added by the Riverside Amusement Company to its list of attractions at Riverside Park and is now open for business. The "Double-Eight Railway" and the "Laughing Gallery" are both to run this summer -- the former is at it now and the latter will be this week, as soon as some changes can be made-but it is the mill that is attracting the curiosity

many Eastern summer resorts. It consists of an apparently small building forming a part of the same front with the other buildings of the amusement company, with a huge mill wheel grinding away in front, whirling the water in a sparkling shower. The building really covers a ground space of 50,000 square feet. The mill wheel creates the current in a narrow stream of water with passengers through a passage that winds in and out for 1,400 feet through the building, treating the passengers to an everchanging scene painted on canvas, but looking much like the real thing. J. S. Sandy has been made manager of

INDIGNANT GREEKS AT POLICE STATION

For a time last night the police station was deluged with indignant Greeks, and from the number of red sandwich carts, the accompanying gasoline lamps which were lined up along the curb, passers-by thought that a street fair was in full blast. Patrolmen Strait and Mullen, who had been having trouble all evening with the Greeks, and their tendency to linger in profitable spots, began a crusade which brought the desired results. Starting to the station with two offenders, John Sakos and James Brouis, they encountered a compatriot, Christ Alexis, who plaintively inquired the cause of his countrymen's arrest. The officers tried to send the man about his business, but he interfered until he, too, was taken in tow, and lined up Greek who appeared with a roll of bills.

One of the stunning gowns seen at French Lick last week was of creamwhite crepe voile embroidered in great clusters of grapes, with foliage. This hand-work extended from the bottom of a demi-train skirt halfway to the waist, and in the bodice the same decoration was taken up in a somewhat smaller pattern. As the grapes were all in outline open work, the effect was much more lacey and summery than one would expect.

A tailored gown quite as greatly admired depended for its novelty upon a rather bold bit of color contrast. The material of this costume was camel'shair, in what might be termed a Bokhara red-duller than garnet and with just that hint of faded cherry which is the charm of Asiatic rugs. Tiny flecks of white which frosted its surface no doubt suggested the decoration, for linings, facings and a threadlike piping were of white taffeta barred with black, quite a large plaid. A straw turban of liberal dimensions, combining the three colors, completed the toilet.

Beauty of dress is not so much a matter of extravagance as of taste. One of the best dressed women in a morning party of a dozen was a young matron of the brunette type whose costume consisted of a walking-length skirt of black and white novelty cheviot and a white lawn shirtwaist, with the smallest bit of embroidered hemstitching about the neck. A black and white tailored hat perfected what was one of the most eye-pleasing outfits one could imagine. Of course, simplicity does not mean cheapness. Fit and fabric mean more to the unadorned frock than to the elaborate, and good weavers as well as good tailors are worthy of their hire.
